

CUSTOM BUILDS

Model Shown: Dual Engine

WWW.POWERPOOLPLUS.COM

Reefer management shouldn't mean fitting your operation around the limitations of a standard generator. Power Pool Plus believes in providing reefer generator solutions that fit within your existing operation; maximizing efficiency and saving you money.

All of our custom designed machines are built with the same focus on craftsmanship and attention to detail as our standard product offerings.

UN-MANNED BARGE APPLICATION

Power Pool Plus has the experience of building power packs capable of navigating long distances between ports of call. Our dual-engine power packs are a proven design that offer trusted engine fail-over switching for peace-of-mind assurance that your perishable cargo will arrive safely.

AUXILIARY POWER CAPABLE

When utility ground power is unavailable due to natural or man-made events, power packs provide a versatile power solution, but only when properly equipped. Exterior or interior mounted connections alongside reefer plug receptacles will ensure your operation is ready for anything.

HIGH PLUG-COUNT MACHINES

Power packs capable of handling high numbers of reefers can be achieved through unique design enhancements.

- Receptacle panels on sides or end frames to spread the load
- Custom fuel tank designs and capacities
- Breaker connections to remote receptacle trees
- Unique louver placement/design to address special applications
- On-board storage racks for remote trees and cables
- Dual engines with fail-over switch gear

COMPLETE REEFER YARD DESIGN PLANNING

Power Pool Plus has years of experience in accommodating huge reefer yard projects that require massive layouts spanning over 500-ft from a single power source and powering 350+ refrigerated loads. Imagine turning an empty yard with no infrastructure into a profitable reefer cargo operation in a fraction of the time and cost. We've helped others. We can help you.

Contact Power Pool Plus to design a customized solution that's Purpose Built just for you.

**EVERY PORT OPERATION IS UNIQUE.
YOUR POWER PACK CAN BE TOO.**
